

Product Data Sheet

System Substrate "Rockery Type Plants"

Order No. 6001 / 612101 / 612201 / 612301

System Substrate for extensive green roofs in multiple layer build-up.

Technical Data

System Substrate "Rockery Type Plants"

Substrate consisting of Zincolit® Plus (sorted high quality crushed brick with selected mineral aggregates), enriched with Zincohum® (substrate compost enriched with fibre materials). Particularly suitable for extensive green roofs with plant species of the ZinCo plant selection "Rockery Type Plants", which can be established by planting plug plants (e.g. ZinCo Root Ball Plants FB 50). Also suitable for extensive green roofs with seed mixtures (e.g. ZinCo Seed Mixture "Meadow scents", "Grassy Pasture" or "Country Colours"), which can be established by seed sowing by hand or by hydroseeding. For optimal plant development the use of an appropriate slow release fertilizer (e.g. ZinCo Plantfit® 4 M) is recommended (as shown in a special data sheet).

Available in 20 l bags, in Big Bags, as loose material in lorries, and in silo trailers. Please calculate with a compaction factor of 1.2. That means for every square metre and 10 mm of substrate you order 12 l.

Delivery options

20 l bag
in Big Bags
loose on lorry
in silo trailer

Order No.

6001
612101
612201
612301

Features

- high-quality recycled product
- excellent water retention
- high air content - even at max. water capacity
- frost resistant and stable in structure
- suitable for pumping
- basic component Zincolit® is under constant quality control by the University of Hohenheim

Chemical and Physical Properties

Parameter	Reference Value
Volume weight *	
- dry	1000 g/l (+/- 100 g/l)
- at max. water capacity	1400 g/l (+/- 100 g/l)
Maximum water capacity	ca. 40 vol. %
Water permeability mod. K _f	0.6–70 mm/min
pH value (in CaCl ₂)	6.5–8.0
Salinity (water extract)	< 2.5 g/l
Organic content	< 65 g/l
Compaction factor	ca. 1.2

* Light-weight versions which reduce the overall weight by approximately 200 g/l are available on request.
